

Quelques composés utilisés couramment en chimie organique

Liste provisoire....

Nom d'usage	Nom IUPAC	Formule topologique
Acide acétique (AcOH)	Acide éthanoïque	
Chlorure d'acétyl (AcCl)	Chlorure d'éthanoïl	
Anhydride acétique (AcOAc)	Anhydride éthanoïque	
Alcool éthylique (EtOH)	Ethanol	
Ether éthylique (EtOEt)	3-oxapentane	
Tétrahydrofurane (THF)	Oxacyclopentane	
Diméthylformamide (DMF)	N,N-diméthylméthanamide	
Anhydride succinique	Anhydride butanoïque	
Anhydride maléïque	Anhydride Zbutènedioïque	
Chlorure de benzyle	Chlorophénylméthane	
Chlorure de vinyle	Chloroéthène	
Chlorure d'allyle	1-chloro-prop-2-ène	
Chlorure de thionyle		
Acétone	Propanone
